

URGENT NEWS FOR CHIROPRACTIC PATIENTS AND FAMILIES

You and your family rely on the **ESSENTIAL** services provided by your Doctor of Chiropractic. In 2009, Washington lawmakers are expected to consider federal health reform legislation that could significantly impact you and your family. During this important debate, it is important that you take steps to ensure that:

 Congress does not restrict your ability to access ESSENTIAL services provided by a Doctor of Chiropractic.

 Congress does not force patients to join or support a health plan they do not want.

 Congress does ensure that Medicare beneficiaries may choose a Doctor of Chiropractic to provide all Medicare covered services for which the Doctor of Chiropractic is licensed to provide.

 Congress does enact new federal protections to help ensure that insurance and managed care companies treat patients fairly and do not deny them their rights or access to the care they need.

Protect your access to ESSENTIAL services provided by your Doctor of Chiropractic!

Join the chiropractic advocacy network by going to www.chirovoice.org or fill out the form provided by your doctor.

By joining you will receive important educational materials and timely Alert Bulletins regarding important health care reform issues from your doctor and the American Chiropractic Association. (PLEASE NOTE: Your e-mail address will remain confidential and will not be shared with third parties).
